EXPERTISE SKILLS

Hard Skills:

- Web Mapping
- Remote Sensing
- Data Visualization
- Data collection
- Cartography

Operations and Logistic:

- Data Analysis
- Geo-referencing
- Digitization
- Geospatial Data Analysis
- Temporal Data Analysis
- HTML, CSS and Python

Tools and Software:

- ArcGIS
- QGIS
- ERDAS Imagine
- ArcPy
- PCI Geomatica
- Google Earth Engine
- Google Earth Pro

LANGUAGE

English ●●●●●●
Hindi ●●●●●
Bengali ●●●●●●●

INTEREST

- Travelling
- Art
- Exploring technologies

01

PROFESSIONAL PROFILE

Proficient in ArcGIS, QGIS, ERDAS Imagine, Google earth engine and programming language like Python. Have hands-on experience in spatial analysis, urban land cover change detection, agricultural crop monitoring. My strong analytical skills, attention to detail, and ability to communicate technical concepts make me a valuable asset for innovative geospatial solutions. Eager to collaborate and contribute to impactful projects in the geospatial industry. Keen to bring fresh perspectives and innovative solutions to the field.

02

EDUCATION

Masters in Remote Sensing and GIS (2023 - 2025)

Institution: JIS UNIVERSITY

- Pursuing M.Sc in remote sensing and GIS
- Department of Earth Sciences and Remote Sensing

B.A in Geography (2019 - 2022)

Institution: Hooghly Women's College

- Academic excellence in Geography (Remote Sensing and GIS)
- CGPA : 8.11

Higher secondary (12th Grade) (2019)

Institution: Binodini Girls' High School

- Percentage: 82.2%

secondary (10th Grade) (2017)

Institution: Binodini Girls' High School

- Percentage: 81.14%

03

EXPERIENCE

- As a fresher and current M.Sc. student in Remote Sensing and GIS, I have engaged in various academic projects, including analyzing land use changes using ArcGIS and collaborating on environmental resource mapping with QGIS, ERDAS Imagine.
- My coursework has equipped me with a solid foundation in GIS technologies and data analysis, while my active participation in the academic groups has enhanced my skills.
- Eager to apply my knowledge and skills in a practical setting through future opportunities.

- Currently engaged dissertation in focused on Glacier research.
- Topic: Response of rock glacier in changing climate: A study on Bhaga Basin, Himachal Pradesh, India.

- **Thematic representation of hazard based maps using MCDM techniques.**
 1. Landslide susceptible zone mapping using MCDM technique: a case study on Darjeeling and Kalimpong, West Bengal.
 2. Thematic representation of potential sites for ground water recharge using MCDM technique: a case study on Bankura sadar, West Bengal.
- **Various thematic representations and spatial analysis using GEE.**
 1. Land Surface Temperature (LST) analysis on a temporal basis on Arunachal Pradesh, India, using Google Earth Engine.
 2. Temporal analysis of NO₂ concentration in India using Google Earth Engine.
- **Thematic representation of Urban changes and changing patterns using ArcGIS, QGIS and ERDAS Imagine.**
 1. Spatio-temporal analysis of land use land cover and expansion of urban area using GIS and remote sensing: a case study on Chinsurah municipality, Hooghly, West Bengal.
 2. Thematical representation of land surface temperature (Lst), surface urban heat index (SUHI) and comfort zones: a case study on Chinsurah municipality, Hooghly, west Bengal.
- **Landsat Image processing.**
 1. Calculating optimum band combination using OIF indexing: a case study on Chinsurah municipality, Hooghly, West Bengal.
 2. Temporal based land use landcover analysis: a case study on land use cover changing areal statistics and land use mix.
- **Networking based works.**
 1. Least cost path using digital elevation model (dem): a case study on Darjeeling, West Bengal.
 2. Centrality analysis: a case study on Dum Dum municipality, north 24 pargana, West Bengal.
- **Other works.**
 1. Prioritization of the sub/micro watersheds based on soil loss potentiality using morphometric analysis: a case study on Kangsabati river basin in Purulia, West Bengal.
 2. Thematic representation of runoff depth using SCS CN method: a case study on Raniband, Bankura, West Bengal.

- **Short Term Course on ArcPy**
 - Institution: KIRS[Kolkata Institute of Remote Sensing]
 - Date: 10/08/2024
- **Remembering Bhuj Earthquake: An Awareness on Seismic Resilience**
 - Organized by Centre for Disaster preparedness & Management Jadavpur university, Kolkata, India In association with Hijli College, Kharagpur, GRRID Corps & CRRP India
 - Date: 18/01/2025
